Art Unit: 1793

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 19-24, drawn to a method of metal die casting.

Group II, claim(s) 25-30, drawn to a die casting apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: For those groups of claims that SHARE a special technical feature, the special technical features does NOT define a contribution over the prior art, i.e. the special technical feature is either anticipated by or obvious in view of the prior art. In the instant application, the special technical feature of die casting of a composite material is either anticipated by or obvious in view of JP 60-102,257.

3. A telephone call was made to Attorney Gibby on March 24, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
